DETAILED ACTION

Election/Restrictions

This application contains claims directed to the following patentably distinct species: Group I (Claims 1-7, 14, 15, 22, 23, 26, 27) is directed towards a printing apparatus for outputting information on a tab sheet and then notifying the user of the print result classified in 358/1.12. Group II (Claims 8-12, 16-20, 24, 28) is directed towards an information processing apparatus with several units for configuring how to execute printing, classified in 710/62. Group III (Claims 13, 21, 25, 29) is also directed towards an information processing apparatus with several units for configuring how to execute printing, but some of the units are executed on differing portions of the print process and according to different criteria, classified in 710/62. The species are independent or distinct because Group I a printing apparatus for outputting information. Group II an information processing apparatus (e.g. computer) for commanding printing. Group III, although similar to Group II is distinct because of the different configuration. Thus, there would be a burden on the Examiner to search three inventions.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claims are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim

Art Unit: 2625

is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).
